

KAPPA-SILK

KS SERIES

KAPPA-SILK has been developed to combine uniform thickness and maximum strength. Constructed with exceptional quality, **KAPPA-SILK** is 100% natural silk, mesh. It is produced and sold in its natural woven state from silk yarn with no further treatment. It is selected for industrial polishing such as on metallurgical samples and softer materials. It is recommended for use on clamp lapping wheels (without adhesive) to which polishing compounds are applied.

APPLICATION & BENEFITS

- **KAPPA-SILK** has residual shrinkage allowing it to tighten to the lap (wheel) when in use, transferring flatness to the polishing surface and protecting from wear.
- Imported in large volumes to make it available to the polishing industry in smaller roll quantities and in cut disc at reasonable prices from stock.
- **KAPPA-SILK** and other polishing materials are sold to leading polishing machine and abrasive manufacturers and to distributors and importers servicing the polishing trade as well as to industrial users.

PHYSICAL CHARACTERISTICS

PHYSICAL PROPERTIES & AVAILABILITY				
MATERIAL	100% NATURAL SILK, MESH		COLOR	WHITE
Size		Approx. Thickness	Thickness w/ PSA	
Pads/Discs	6" - 36"	.005"	N/A	
Sheets	N/A			
Yardage	54" Width			
Pressure Sensitive Adhesive	KAPPA-SILK is not offered with a PSA (pressure-sensitive adhesive).
