

ZETA-ZILK
ZZ SERIES

ZETA-ZILK combines uniform thickness and maximum strength. Constructed with exceptional quality, **ZETA-ZILK** is 100% natural silk, mesh. It is a tightly woven white fabric with a satin finish, 65% Rayon, 35% natural silk, available without PSA in yard goods and with PSA in sheets. It is stable when wetted with no compression. A polyester interface between **ZETA-ZILK** material and the down side adhesive to apply to the lap prevents penetration of the polishing compound, weaken the bond to the lap, and allow for clean removal when replaced.

APPLICATION & BENEFITS

- Wide range of use from fine diamond to final polishing compounds. Especially recommended for soft crystal finishing as well as sapphire.

PHYSICAL CHARACTERISTICS

PHYSICAL PROPERTIES & AVAILABILITY				
MATERIAL	RAYON/SILK SATIN		COLOR	WHITE
Size		Approx. Thickness	Thickness w/ PSA	
Pads/Discs	6" - 36"		.013"	.015"
Sheets	48" x 70"			
Yardage	48" Width			
Pressure Sensitive Adhesive		When PSA is specified (pressure-sensitive adhesive), a polyester interface with down side adhesive protected by a removable paper, is applied. The bond to the lapping plate remains firm with various polishing vehicles including water, oil, alcohol, and most commonly used slurries, yet removes cleanly when changed.
